RIO Property Group Account Manager Comments

RIO Property Group continues its current trend adding 2.04 % this quarter with a net gain of 12.68% during the past 9 months alone. This year's performance was bolstered by the spectacular of the first quarter producing a return of 7.71% which had been a major factor in this year's positive numbers.

The investment is up 33.01% since launch, as it jockeys with the ARC which remains RIO's star performer to date. Looking ahead, there is no slow down forecasted. Especially given that RIO have enough work load to see us through to September 2016.

That being the case I am scheduled to visit the UK sites personally in November. RIO Property Group has completed the second of its five projects and is firmly focused on project three and four.
