

MANAGER COMMENTS

The Account gained 2.21% during August, this month being its fifth consecutive gaining month. Given that gold had rallied strongly over the past three months, pushing the metal to a five year high, I retained the safety stance taken in July to protect the gains already banked. In my previous report I had forecast Gold to push above \$1,500. It has done so in a matter of months. As such the Bullion market is very much in 'Bull' mode but, backed by over 20 years of trading experience, I am well aware that such sudden gains increase the down side risk and simply put a correction is likely. That said, I expect to be able to buy in during the forecasted correction, as always this strategy allows RIO to produce constant gains, but importantly at a reduced risk to the investor.

INVESTMENT OBJECTIVE

To provide a secure alternative to that offered by the lackluster industry standard bullion investment products or funds. The ARC holds 100% of its Bullion assets in unencumbered and uncirculated one ounce Gold coins, officially released by several government mints. The ARC selected gold coins because they offer a significant legal and monetary advantage over that offered by the traditional Bullion bars.

Analysis confirms that gold can be used within investment portfolios to protect global purchasing power; today this is very pertinent given that several governments are employing policies which ultimately target a devaluation of their individual currencies. As this global currency war has escalated there has been an increased risk of a currency debasement and the fact that gold can offer protection from this event is very attractive in itself. There are a multitude of reasons to invest in physical gold, notwithstanding the fact that it also offers portfolio protection, in terms of currency devaluation and/or inflation. Bullion also reduces portfolio volatility and can minimise loss during periods of both political upheaval and market shock.

INVESTMENT MANAGER

RIO's Investment Manager has vast experience having designed, launched and managed several Government licensed mutual funds over the past two decades. He has actively traded stocks, bonds, currencies and commodities with some degree of accuracy. He is perhaps best known for being among the first in the investment industry to correctly predict the arrival of the bull market in gold.
