## THE RIO CLUB and Jakarta International Football League

The Jakarta International Football League (JIFL) is an amateur soccer league comprising twelve teams, some with a national flavour but most with representatives from many countries.

There are over 250 registered players from a wide range of territories including, USA, Australia, Japan, much of South America and most of Europe with some also from home country Indonesia.

For 2017/18, the main sponsor of JIFL is RIO Investment Club. All teams display the RIO logo on their kit and the league is named RIO Jakarta International Football League.

On 9 September the JIFL held a party at Eastern Promise, Kemang, Jakarta to celebrate the winners from season 2016/17 and mark the season KO for 2017/18.

The party was a huge success, some players going AWOL from their homes for the entire weekend!

Trophies for team and individual winners of 2017/17 season were presented during the evening and the winners of “on the night” table football and beer pong competitions rounded off the prizes - the RIO logo was prominently displayed on the stage during all activities

During the party opening and during presentations the JIFL Committee thanked RIO as main sponsor, noting that the funds have already been put to good use through referee training and an upgraded RIO JIFL website (<http://jifleague.com/>)

The 2017/18 season is now well underway with many exciting games already played, early leaders are team Cameroon – but a long way to go yet

The JIFL appreciate the support of RIO Investment Club and look forward to a great partnership.
