

RIO CURRENCY CONCEPT ACCOUNT

1 October 2020

MANAGER COMMENTS

The Currency Concept account posted yet another gain this quarter, up 2.21%. This account is exceptional, producing eight consecutive gaining quarters since launch, with a return of over 28% recorded. The lack of volatility is a real attraction to any investor.

Finally, there has been some positive news from the ongoing Brexit negotiations. The EU has made some concessions, expressing they are now ready to drop demands for a broad agreement on the areas of divergence before drafting a trade text; something they had initially refused to do. In return Britain offered Brussels a three year transition period on the fishing trade.

Sterling had been under pressure during September, but rallied on the positive news. Looking forward, any further positive trade news will almost certainly result in Sterling rallying back in to the 1.30-1.350 range.

INVESTMENT OBJECTIVE

The RIO Currency Concept Account is the latest investment product to be designed and launched by RIO. It will take full advantage of the continuing Brexit volatility to place, execute and close currency trades. It is hoped that by successfully forecasting the future movement in currency and exchange rates, profits can be made for those invested as the exchange of one currency for another enables the account to achieve potential capital gains.

Any investment which has the potential to make gains in this way must inherently have the potential to make a loss. That said, the strategy utilised and the trading approach are both designed to offer members the potential of substantial gains whilst limiting the downside risk. Unique products such as this have been solely created for our membership and as always are not available to the general public.

The investment objective is to provide members with a convenient means of participating in an actively traded currency portfolio, primarily currency oriented, aimed at achieving capital appreciation. The secondary objective is to provide liquidity.
