

RIO CURRENCY CONCEPT ACCOUNT

1 April 2020

MANAGER COMMENTS

The Currency Concept account has produced a gain of 1.84% in the first quarter of 2020. To date this actively traded currency account has produced six consecutive gaining quarters and has a net return of 24.77%. The account should do exceptionally well throughout the remainder of the year due to the Sterling/Dollar movement.

The first quarter of the year gave me several opportunities to trade; on the 13th March Sterling started to react to the lack of liquidity and the building concern regarding the access to US dollars, this caused the mighty pound to plummet near 10% in value in the short term. The pound has since been the primary benefactor of the recent fed action to introduce measures to tackle the liquidity squeeze. This has in turn produced a rally in Sterling which has seen it regain much of the ground lost.

INVESTMENT OBJECTIVE

The RIO Currency Concept Account is the latest investment product to be designed and launched by RIO. It will take full advantage of the continuing Brexit volatility to place, execute and close currency trades. It is hoped that by successfully forecasting the future movement in currency and exchange rates, profits can be made for those invested as the exchange of one currency for another enables the account to achieve potential capital gains.

Any investment which has the potential to make gains in this way must inherently have the potential to make a loss. That said, the strategy utilised and the trading approach are both designed to offer members the potential of substantial gains whilst limiting the downside risk. Unique products such as this have been solely created for our membership and as always are not available to the general public.

The investment objective is to provide members with a convenient means of participating in an actively traded currency portfolio, primarily currency oriented, aimed at achieving capital appreciation. The secondary objective is to provide liquidity.
