

The Account continues to do exactly what it was designed to do and since launch the ARC has significantly outperformed gold bullion in bar form. With gains of 20.54% since launch the ARC has shown its true worth; statistics reveal that gold bullion in bar form has returned a net loss of -8.68 % over the same period.

Performance data therefore illustrates that the account has outperformed gold bullion by 29.22% since its launch nineteen months ago; which ranks this investment among the best performing bullion investments in the world. With an average return of 1.54% per month it is the envy of many in the industry.

Having conducted a detailed analysis of bullion funds and related investments offered by other investment houses our study revealed that their performance has been very lacklustre. In a purely statistical comparison, RIO ARC Bullion account valued in USD has outperformed all comparable physical gold bullion investments throughout 2014 and to date.
