## MANAGER COMMENTS

RIO Property launched the third version of our five-year fixed term property portfolio investment in January, primarily to take advantage of an undervalued market set to recover from the Brexit blues.

We have since secured the first of the proposed commercial properties with a government tenant and during February we reached the final stages of preparing and submitting planning requirements to develop land that has been acquired.

Members will recall the previous Property account delivered 69.43% during its 5 year run.

## INVESTMENT OBJECTIVE

The investment objective is to provide capital appreciation from a combination of renovation and development projects.

The projects are UK based and predominantly in prime city locations.

RIO has secured a select parcel of commercial properties that will immediately benefit from a change of use from commercial to residential. Importantly all properties within the portfolio are owned outright, there are no mortgage or loans utilised to purchase land or buildings and the redevelopment cost are also financed in cash terms.

The investment is to be structured as low risk and offers an attractive alternative to the normal low risk low return paradigm.

It should be noted that shares in RIO Property Group Limited are not available or promoted to members of the general public.
