RIO REGULAR INVESTMENT ACCOUNT USD

1 April 2024

MANAGER COMMENTS

The Regular Investment Account USD gained 1.28% during March and has filed its third consecutive gain this year. In 2023 this investment posted a net gain of 10.03%, but it's the consistent positive performance over the years which has made the account such a popular holding with members. The statistics say it all; the account has produced eight consecutive gaining years, with a net gain of 30.89%, 66.55% and 276.30% over the three- five- and eight-year periods.

It is, however, not just about gains, it is also about correct positioning. This was typified in 2022 as almost every other investment house at that time was over weighted to equities, I had positioned the account to be underweighted in equities, the reason being that I had forecast that a market crash was imminent. The safety stance both avoided losses and retained gains, this becomes clear when you note that more than 95% of equity funds suffered double digit losses in that year. It is fair to say that the performance over the past eight years, highlighted above, have made the Regular Account the envy of many in the investment industry. It is also interesting to note that during this period the account was one of the least volatile equity investments on the market.

INVESTMENT OBJECTIVE

The RIO Regular Investment Account is a high-risk trading platform through which RIO invests in the currency, equities and commodity markets. The Account may also invest in other high risk traded securities, where the potential gains are deemed to be in line with the risk reward ratio. The trading strategy favours a midterm investment of 4 - 5 years due to the expected short-term volatility.

Currencies - The Account provides exposure to a traded basket of hard currencies from countries with sound monetary policies. Longer term this strategy seeks to profit from a rise in hard currencies relative to the decline of the US Dollar.

Commodities - The Account's focus is directed to trading Gold, Silver, Oil and Uranium and their associated markets. The Investment Manager has over two decades trading experience in these markets during which time he has exceeded the target returns.

RIO REGULAR INVESTMENT ACCOUNT USD

1 April 2024

VOLATILITY & RISK (24 Months)		
	RIO RIA	Dow Jones
Annualised Volatility	5.58%	22.95%
Return for Period	19.79%	13.00%
Best Monthly Return	3.75%	12.44%
Worst Monthly Return	-2.33%	-8.07%
Risk / Reward Ratio	8.50:1	1.61:1

The risk/reward calculation is a division of net profit (the reward) by the price of your maximum risk. Any investor should determine their acceptable risk, but it is always best to be more conservative with risk than aggressive with reward.
