

RIO REGULAR INVESTMENT ACCOUNT USD

1 October 2024

MANAGER COMMENTS

The RIO Regular Investment Account USD gained 0.43% during September. This investment is poised to take advantage of the massive investment opportunity which surrounds the US election. Recently we all witnessed what was a good performance from Kamala Harris at the first (and likely only) presidential debate. This had moved the odds makers assessment of the situation back to a virtual 50-50 with the previous assessment indicating 6-7 points in favour of Trump. I would strongly underline that should the polls still be this close on Election Day, the market reaction to the outcome will likely be quite substantial. Those willing to take risk should consider investing in RIO Regular USD or Stock Trading USD as both could post strong gains in the coming weeks.

America - A land of inequality. We all know that the US is plagued by high levels of inequality, but a look at the numbers is truly staggering. According to the US' St. Louis Fed, the wealthiest 10% of the country's population has 67% of the country's wealth, while the bottom half of American has a mere 2.5%. These numbers have generally only gone in one direction since the point of maximum American equality in the 60's and 70's. This is certainly one of the chief drivers of a very politically divided America, with the two political sides finding very different targets for their dissatisfaction with the status quo.

INVESTMENT OBJECTIVE

The RIO Regular Investment Account is a high-risk trading platform through which RIO invests in the currency, equities and commodity markets. The Account may also invest in other high risk traded securities, where the potential gains are deemed to be in line with the risk reward ratio. The trading strategy favours a midterm investment of 4 - 5 years due to the expected short-term volatility.

Currencies - The Account provides exposure to a traded basket of hard currencies from countries with sound monetary policies. Longer term this strategy seeks to profit from a rise in hard currencies relative to the decline of the US Dollar.

Commodities - The Account's focus is directed to trading Gold, Silver, Oil and Uranium and their associated markets. The Investment Manager has over two decades trading experience in these markets during which time he has exceeded the target returns.

CUMMULATIVE PERFORMANCE (Five Years)

The performance of the Dow Jones (the benchmark) is provided for comparative purposes only.

This document is not an offer of investment. Subscriptions for shares in the Account can only be made on the basis of the current literature and The RIO Club operates strictly on a referral only basis. Past performance is not a guide to future performance and there can be no assurance that the Accounts objective(s) will be met. The value of investments and the income from them can fall as well as rise and is not guaranteed. Investors may not get back the full amount invested. This investment account is high risk and is very likely to experience volatility, it is designed for members who accept a high level of risk for a potential high gain over the mid to long term. Changes in the rates of exchange between currencies may cause the value of investments to diminish or increase. Current tax levels and reliefs may change and depending on individual circumstances this may affect the investment return. For further information please refer to the terms and conditions.

RIO REGULAR INVESTMENT ACCOUNT USD

1 October 2024

ASSET ALLOCATION (%)

VOLATILITY & RISK (24 Months)

	RIO RIA	Dow Jones
Annualised Volatility	4.69%	20.57%
Return for Period	20.49%	44.81%
Best Monthly Return	3.75%	12.44%
Worst Monthly Return	-0.43%	-3.96%
Risk / Reward Ratio	8.81:1	11.32:1

The risk/reward calculation is a division of net profit (the reward) by the price of your maximum risk. Any investor should determine their acceptable risk, but it is always best to be more conservative with risk than aggressive with reward.
