

RIO REGULAR INVESTMENT ACCOUNT GBP

1 July 2024

MANAGER COMMENTS

The Regular Investment Account GBP posted a return of -0.32 % during June, this being the only loss reported in 2024. In direct comparison the account's benchmark, the FTSE 100, fell -1.34% over the same period. The monthly returns are of course of interest, but it's the return over the one-, two- and three-year periods which are more relevant, these are 6.77%, 17.14% and 26.42% respectively. A statistic which is often overlooked when considering investment is the risk/reward ratio. I would stress that this is a very important number when evaluating any investment. A risk-reward ratio of 4 is considered reasonable, 8 is considered excellent; the risk/reward ratio of 16.29-1 for the Regular Investment Account puts this investment in a class of its own.

The Market - Revised official data on Friday showed the UK economy exiting the recession faster than expected in Q1 of this year, the new figures in fact indicate that Britain is witnessing the fastest economic growth since 2021, however, the market remains poised for the upcoming election. Economic growth has become a key issue in the upcoming election, as the country has emerged from COVID with lagging growth seen in the UK over the last few years. That said, compared with other G7 nations, the UK saw the strongest growth last quarter.

INVESTMENT OBJECTIVE

The RIO Regular Investment Account GBP is a high-risk trading platform through which RIO invests in currency, UK equities and commodity markets. The Account may also invest in other high risk traded securities, where the potential gains are deemed to be in line with the risk reward ratio, at the discretion of the investment manager. The trading strategy favours a midterm investment of 2-3 years due to the expected short-term volatility.

Brexit sparked an unprecedented wave of volatility in UK markets. The pound immediately plunged to its lowest in 30 years and has since suffered very large intra-day moves. The FTSE 100 tanked before rallying and enjoying one of its best up cycles in recent times achieving a series of record highs in early 2017. As an active trader these types of swings are a prime investment opportunity and we expect further volatility associated with Brexit negotiations in coming months, these swings could easily produce a prime investment opportunity. Exiting the EU will affect UK companies. The Account will focus predominantly on trading those entities listed on the FTSE 100 index and has identified several trading opportunities.

ASSET ALLOCATION (%)

VOLATILITY & RISK (24 Months)

	RIO RIA	FTSE 100
Annualised Volatility	3.70%	16.84%
Return for Period	17.14%	13.88%
Best Monthly Return	1.91%	6.74%
Worst Monthly Return	-0.95%	-5.76%
Risk / Reward Ratio	16.29:1	2.58:1

The risk/reward calculation is a division of net profit (the reward) by the price of your maximum risk. Any investor should determine their acceptable risk, but it is always best to be more conservative with risk than aggressive with reward.
