

RIO REGULAR INVESTMENT ACCOUNT GBP

1 November 2024

MANAGER COMMENTS

The Regular Investment Account GBP gained 0.31% in October, this positive return in stark compassion to the FTSE 100, which ended the month down 1.54%. All trades closed during the month were closed in profit, notable trades being - Carnival Corporation PLC, acquired on the 25th and sold on the 31st banking gains of over 5% and Anglo American PLC bought on the 16th and sold on the 22nd with a gain of plus 4%.

Market - The FTSE 100 hit its lowest level in August when the UK Finance Minister Rachel Reeves confirmed that she would raise taxes by 40 billion pounds (\$52 billion) annually in her first budget. The most brutally hit was rate-sensitive areas of the market, as markets temper their expectations for how quickly the Bank of England will cut interest rates. Should interest rates remain higher for longer, this would not be good news for house builders and retailers hoping for reduced pressures on household finances. This is why banks were among the select few risers on the FTSE 100, as they stand to benefit from a more substantial interest rate environment as they can charge more for lending. I expect volatility in the near term but remain very optimistic about the medium-to long-term outlook for UK equities. Fundamentally, UK equities offer attractive exposure to the Value factor.

INVESTMENT OBJECTIVE

The RIO Regular Investment Account GBP is a high-risk trading platform through which RIO invests in currency, UK equities and commodity markets. The Account may also invest in other high risk traded securities, where the potential gains are deemed to be in line with the risk reward ratio, at the discretion of the investment manager. The trading strategy favours a midterm investment of 2-3 years due to the expected short-term volatility.

Brexit sparked an unprecedented wave of volatility in UK markets. The pound immediately plunged to its lowest in 30 years and has since suffered very large intra-day moves. The FTSE 100 tanked before rallying and enjoying one of its best up cycles in recent times achieving a series of record highs in early 2017. As an active trader these types of swings are a prime investment opportunity and we expect further volatility associated with Brexit negotiations in coming months, these swings could easily produce a prime investment opportunity. Exiting the EU will affect UK companies. The Account will focus predominantly on trading those entities listed on the FTSE 100 index and has identified several trading opportunities.

INFORMATION

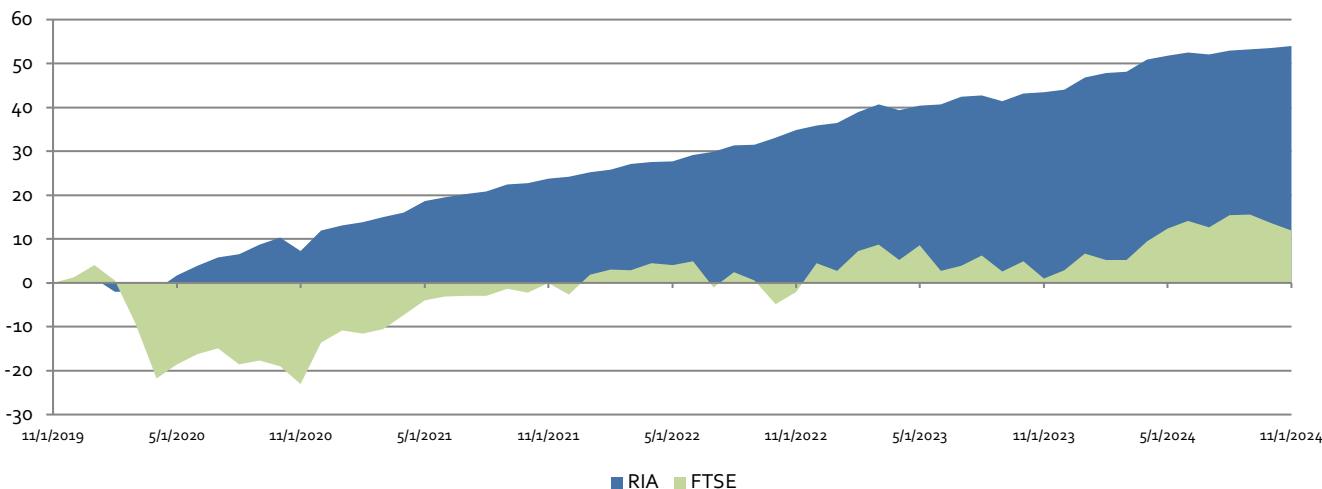

NAV	228.68
Launch Date	June 2017
Investment Manager	William Gray
Currency	GBP

ASSET ALLOCATION (%)

VOLATILITY & RISK (24 Months)

	RIO RIA	FTSE 100
Annualised Volatility	3.65%	14.42%
Return for Period	14.24%	14.31%
Best Monthly Return	1.91%	6.74%
Worst Monthly Return	-0.95%	-5.39%
Risk / Reward Ratio	13.53:1	2.66:1

The risk/reward calculation is a division of net profit (the reward) by the price of your maximum risk. Any investor should determine their acceptable risk, but it is always best to be more conservative with risk than aggressive with reward.
