

With another quarter at an end RIO Property Group continues its current trend with this quarters return netting a gain of 2.52%. This is more than acceptable given the spectacular previous quarter return of 7.71% and its overall performance of 10.23% in the past six months alone, up 30.36% since launch.

It is the Clubs star performer. The company have forward booked works through to September 2016 and are bidding for another project, as I write, that would give a full work load well in to 2017.

With RIO Property Group completing the second of its five projects the company is firmly focused on project three and four. Looking ahead, I plan to visit the UK site personally this month in time to witness the installation of main services such as gas, electricity and water. Our market survey confirms that consumers have been more confident about buying big ticket items, this on the back of a rise in net unsecured credit lending while personal deposits have grown at a modest pace.
